SUBJECT INDEX

Abscess, adrenal, in a neonate presenting as a renal neoplasm, 565
renal, or acute focal bacterial nephritis? A sonographic diagnosis, 461
Abstracts of Proceedings of Urological Society of Australasia: 34th AGM, Sydney, Australia, 1981, 71
Achondroplasia in one of two brothers with testicular cancer, 427
Adenocarcinoma, mucin secreting, of prostate, 63
Adrenal abscess in a neonate presenting as a renal neoplasm, 565
Adriamycin (doxorubicin) and urokinase, combined intravesical therapy in management of superficial bladder tumours, 280
Ambulatory continuous urodynamic monitoring, 357
Aminoglutethimide therapy for advanced carcinoma of prostate, 552
Amyloidosis localised to the bladder, 428
Antisperm antibodies, studies of testicular and epididymal damage in relation to their occurrence, 769
Argentaffin carcinoma, primary, of testis, 429
AUTHORS' FOLLOW-UP
KYLE, K. F. Ultrasound in the staging of bladder tumours, 65
NEWSAM, J. E. and LAW, H. T. Hyperthermic perfusion of the distended urinary bladder in the management of recurrent transitional cell carcinoma, 64
SMART, C. J. The use of frusemide and episilon-amino-caproic-acid in transurethral prostatectomy, 437
SPLATT, A. J. The urethral syndrome: experience with the Richardson urethroplasty, 566

Bacteraemia resulting from prostatic surgery: the source of bacteria, 542
Bacteroides ruminicola pyonephrosis, 432
Balanitis, keratotic and micaceous pseudoepitheliomatous, 431
Bilharzial strictures of the ureter, surgical management, 103
Bladder activity, unstable, and micturition symptoms in girls with primary vesicoureteric reflux, 494
amyloidosis, localised, 428
cancer, advanced, combination chemotherapy for, 16
Ta and T1: location, recurrence and progression, 152
the role of palliative urinary diversion in its management, 363
treatment of T3: controlled trial of pre-operative radiotherapy and radical cystectomy versus radical radiotherapy. Second report and review (for the Clinical Trials Group, Institute of Urology), 136
capacity measurement at physiological pressure under anaesthesia, the clinical value of, 650
carcinoma, advanced, treated with combination chemotherapy, 366
non-infiltrating, a preliminary report on prognostic factors, 711
urinary, computed tomography in staging, 158
with paraneoplastic hypercalcaemia, 320
congenital neuropathic, a system of management based upon combined urodynamic and radiological assessment, 507
continent caecal, 505
denervation and cooling: a new approach, 667
distended urinary, hyperthermic perfusion of, in management of recurrent transitional cell carcinoma. A review after 6 years, 64
drill for the treatment of enuresis in adults, 118
drill in the management of urinary incontinence due to primary vesical sensory urgency, 374
dysfunction following rectal and uterine surgery, an anatomical explanation for, 501
dysfunction, neurogenic, in children, the use of internal urethrotomy to reverse upper renal tract dilatation, 292
emptying, radiological assessment of, 499
grafts, omentally wrapped partial thickness, in dogs, in the replacement of segments of excised ureters. A preliminary report, 216
histological appearances of its nerves in patients with denervation of the bladder after excision of the rectum, 658
immunological profile of patients with transitional cell carcinoma of, 11
instability, suppression by penile squeeze, 360
neck incision, unilateral, for bladder neck obstruction, a subjective and urodynamic assessment, 114
obstructed, urothelial abnormalities in, 234
outflow obstruction treated with phenoxybenzamine, 527
squamous cell carcinoma of. A review of 114 patients, 522
training in detrusor dysfunction in the female, a reassessment, 372
transitional cell carcinoma of, natural killer cell activity and response to phytohaemagglutinin compared with the histological diagnosis of patients with, 261
tumours, in Malawi, 275
staging by ultrasound. A review after 6 years, 65
superficial, combined intravesical therapy with doxorubicin (Adriamycin) and urokinase, 280
survival rates of patients. An experience of 1744 cases (1950-1978), 267
the significance of ploidy and proliferation in their clinical and biological evaluation: a study of 100 untreated cases, 130
urinary, sterilisation following instillation of Thiotepa, 60
Boari flap, a critical appraisal of, 682
Bone scan or serum acid phosphatase, is prostacyclin a better marker in prostatic cancer?, 26

obstruction caused by congenital ureteric valves. Report of 5 cases, 98
reflux, intra-prostatic: an aetiological factor in abacterial prostatitis, 729
risk factors in renal stone formers, dietary management of, 578
retention, and granulomatous prostatitis following sacral herpes zoster infection. A report of 2 cases with review of the literature, 166
post-operative, and urological assessment in a male population having total hip replacement, 519
tract, endoscopy, out-patient, a comparison of cephazolin sodium and co-trimoxazole as prophylactic antibiotics, 417
function, lower, and the role of endorphins. The effect of

opioid blockade on the detrusor and urethral sphincter mechanisms, 638
malakoplakia of, 181
morphology, upper, compared with diuresis renography in idiopathic hydronephrosis in childhood, 603
of the dog, action of imipramine on, 5
stone disease, calcified upper, a prospective 7-year study of the importance of cadmium as a factor in, 584
undiversion, assessment for and results of, 703
Urine, infected human, the resistance of polyglycolic acid sutures to attack by, 313
spontaneous extravasation from the kidney in children, 458
Urodynamic, and radiological assessment in the management of the congenital neuropathic bladder, 507
and radiological studies in the assessment of congenital neurovesical dysfunction, 512
and subjective assessment of unilateral bladder neck incision for bladder neck obstruction, 114
evaluation after vaginal repair and colposuspension, 377
monitoring, continuous ambulatory, 357
unit in a district hospital, its clinical value and cost, 635
Urodynamics of neurogenic bladder in children. A comparative study with clinical and radiological conclusions, 239
Urography, excretory, followed by crystalluria, 341
intravenous, as a routine examination in epididymitis—a re-evaluation, 415
Urokinase and doxorubicin (Adriamycin), combined intravesical therapy in the management of superficial bladder tumours, 280
Urological, assessment and post-operative urinary retention in a male population having total hip replacement, 519
hypertensive patients, their peripheral and renal vein plasma renin activity, 348
Instruments: Report of Standing Committee on Irrigating Resectoscopes, 1
Report on Lasers in Urology to Standing Committee, 421
manifestation of caries spine—mushroom kidney, 430
Society of Australasia: Abstracts of Proceedings of 34th AGM, Sydney, Australia, 1981, 71
Urology, Lasers in: Report to the Standing Committee on Urological Instruments, 421
Urothelial abnormalities in the obstructed bladder, 234

Vaginal repair and colposuspension, urodynamic evaluation after, 377
Valves, congenital ureteric—a cause of urinary obstruction. Report of 5 cases, 98
Varicocele, the hormonal pattern and its relationship with the findings of testicular biopsy: preliminary results, 300
Vas deferens, absent, in association with renal ábnormalities, 298
Venography, gonadal, its role in the management of the adult with non-palpable undescended testis, 408
Vesicostomy, hidden, 686
Vesicoureteric reflux, in children, results of conservative management, 672
primary, in girls: micturition symptoms and unstable bladder activity, 494
Vesicourethral dysfunction, neuropathic, in children, video-urodynamic evaluation of, 645
in children: a trial comparing clean intermittent catheterisation with manual expression combined with drug treatment, 641
electromyography: facts or artefacts, 381

Wegener's granulomatosis and necrotising urethritis, 434
Whitaker revisited, 594

Zeiss indwelling probe, its use in the delivery of low ureteric stones, 223
